

15th October, 2022

Dear ETLTC Participant(s),

Congratulations on your conditional acceptance for the ETLTC-ICETM 2023 conference to be held virtually and on campus at the University of Aizu, Japan. You will be expected to deliver an oral presentation at the conference.

Paper # 2998

Paper Title: The Core of Experience: Role of ICT in Mathematics Teaching in Pesantren

We have now received two out of three reviews for your paper and based on the majority decision, your paper has been conditionally accepted for presentation and subsequent publication in the proceedings / IJEnTM.

However, please be aware that the third review is still pending and the conditional acceptance suggests that the comments from the third reviewer, whenever available, must be integrated into the final camera-ready version.

The above-mentioned paper has been reviewed following the double-blind review process.

If all conditions are met, the paper could be formally accepted for publication at the Scopus-indexed conference proceedings (as reported by the publishers).
